

Map Description And Prop Placement

Map Description And Prop Placement

1. Map Overview
2. Area Description
3. Prop Description
 - 3.1 Tag Code
 - 3.2 Shelves & Pallets
 - 3.3 Blue Pad
 - 3.4 Trash Bin
 - 3.5 Color Block

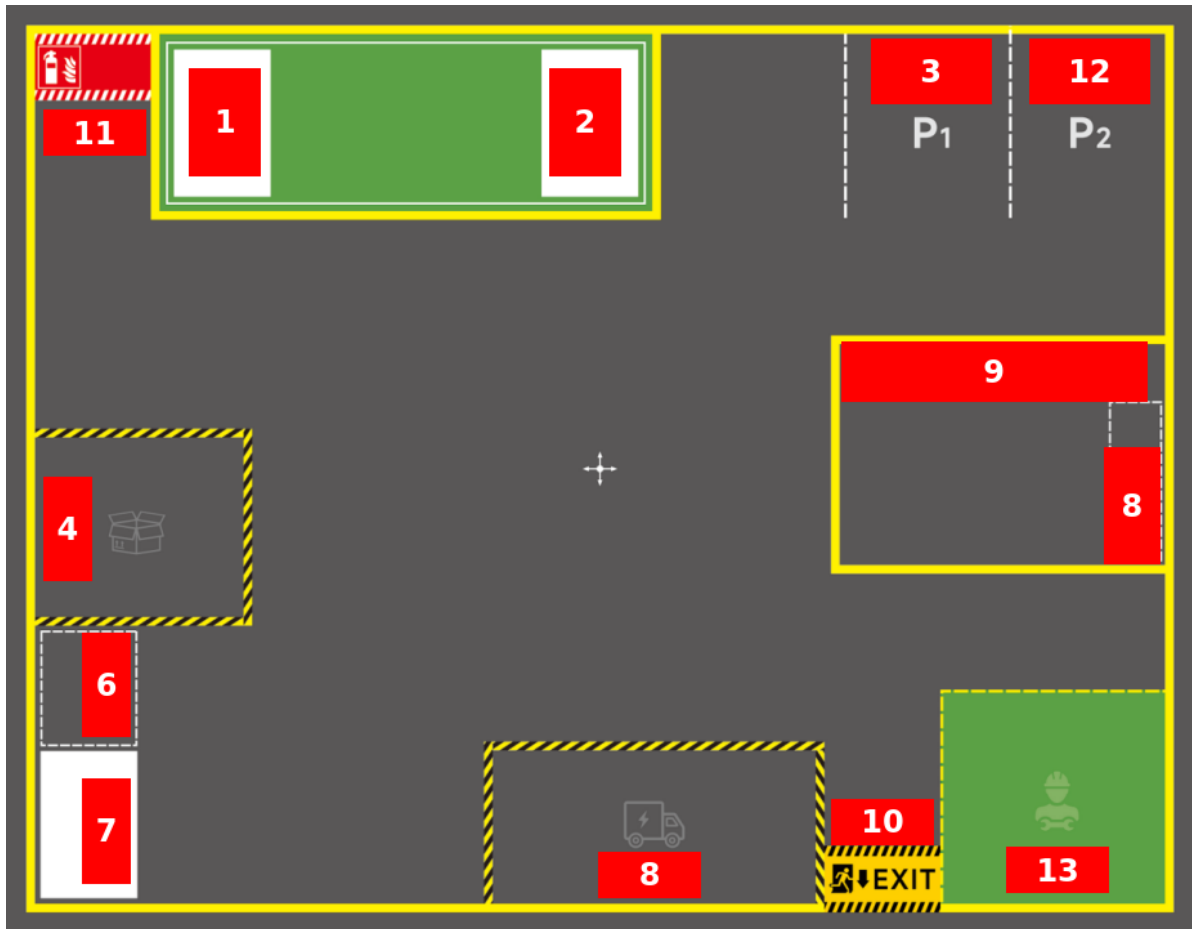

1. Map Overview

2. Area Description

- Area naming is arbitrary, **you can define them according to actual needs**. The following area naming and placement are for reference only
- 1, 2, 7: Shelf area (place shelves & pallets)
- 3: Parking lot 1
- 12: Parking lot 2
- 4: Cargo warehouse (place blue pads, color blocks)
- 6: Cargo sorting area (place blue pads, color blocks)
- 8: Garbage sorting area (place garbage blocks)
- 9: Trash bin area (place trash bins)

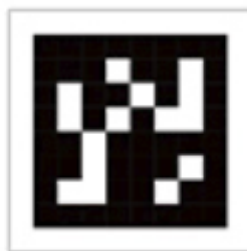

- 10: Exit
- 11: Fire equipment area
- 13: Equipment maintenance area

3. Prop Description

3.1 Tag Code

- Used for visual relocation enhancement, correcting positioning errors caused by various reasons, providing robustness for robot global localization

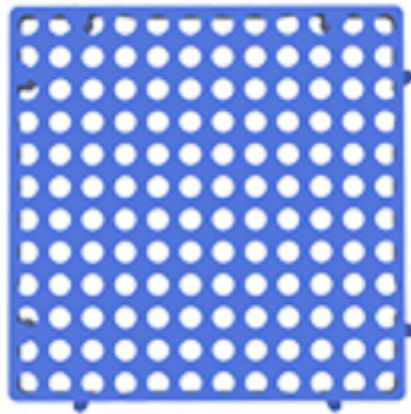

3.2 Shelves & Pallets

- Used for placing cargo blocks

3.3 Blue Pad

- Used to simulate cargo pallets in a real warehouse

3.4 Trash Bin

- Used in garbage sorting tasks where the robot sorts garbage into corresponding trash bins

3.5 Color Block

- Used to simulate cargo of various colors, for robotic arm grasping tasks such as cargo sorting and cargo transport
